

Library Update

No.17, 13th September, 2021

Library to launch new online catalogue late September

Our trusty [catalogue](#) is getting a makeover. It has served us well since 2006, but it's time for an upgrade. In fact, our entire Library Information System is getting a refit.

We're busy going through pre-migration check lists and testing our new environments. All being well, we'll be announcing go live in the next Library Update so watch this space!

You can use the catalogue to find ebooks, print books and other collections.

Medscape's eMedicine: an alternative to UpToDate

The [eMedicine](#) point-of-care clinical reference features up-to-date, searchable, peer-reviewed medical articles organized in specialty-focused textbooks. Available as an app or via the web, eMedicine is totally free (after registering).

It also has a consultation feature, a network for clinicians and medical students to discuss medical topics and share challenging patient cases. Features included:

- More than 7,600 articles on diseases, conditions, and procedures, enhanced with images and step-by-step videos, and authored by specialists.
- More than 1,000 paediatric articles organised into 14 subspecialties.
- Over 25,000 multimedia files including photographs, imaging studies, audio files, and videos.
- More than 8,500+ prescription and over-the-counter drug monographs, including herbals and supplements.
- A separate *Video* section which includes Medscape TV, conference recaps, interviews, CME, and education.
- Essential reference tools, including a drug-interaction checker, and medical calculators.
- A *News & Perspective* section dedicated to Pediatrics.

Get the app

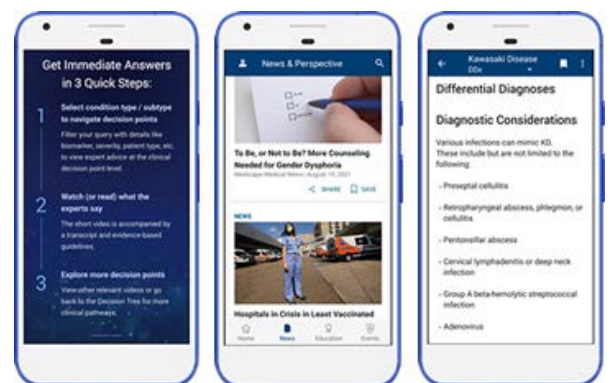

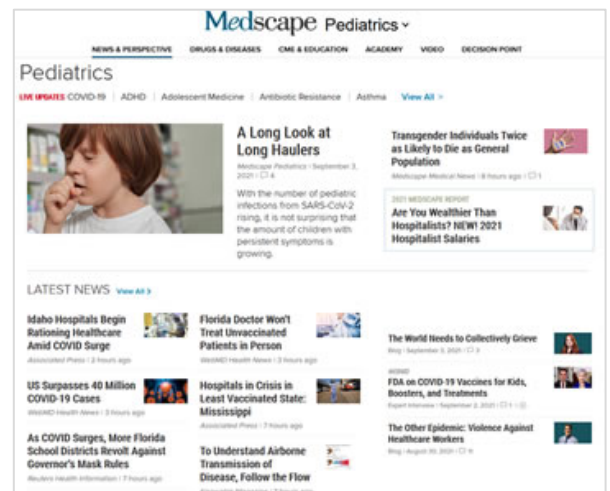

The *Medscape* mobile app is available for [iOS](#) and [Android](#). Both the website and app share many of the same features, including comprehensive medical

The new catalogue will be easier to use, has more functionality, and has a more modern look and feel, including mobile responsiveness.

From September 16 to 27, our current catalogue will be read only until it is decommissioned.

This means you won't be able to place holds or manage your current loans.

However you will still be able to search and access all books including ebooks. We recommend that you [contact us](#) first to enquire about any print books before you visit, or if you have any questions.

information, news, drug and disease information, medical news (tailorable to your interests) and continuing professional development and educational activities.

Library Update

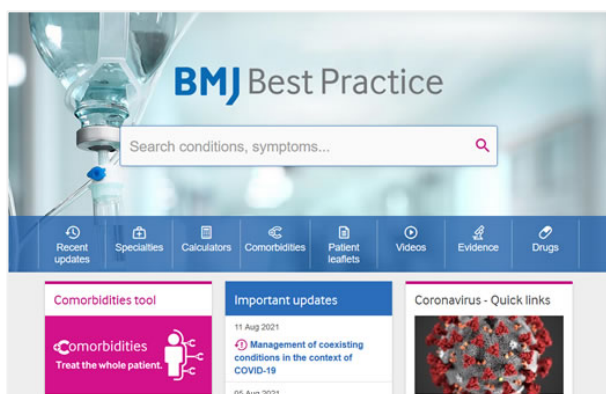

BMJ Best Practice – latest updates

BMJ Best Practice brings a step-by-step approach to decision support. It is structured around the patient consultation, covering diagnosis, prognosis, treatment, and prevention.

We recommend this resource as an alternative to UpToDate.

Recently updated topics:

- [Acute otitis media](#)
- [Assessment of fever in children](#)
- [Assessment of food allergies and sensitivities](#)
- [Assessment of nausea and vomiting in children](#)
- [Common cold](#)
- [Foodborne E coli infection](#)
- [Management of coexisting conditions in the context of COVID-19](#)
- [Meningococcal disease](#)
- [Obesity in children](#)
- [Type 1 diabetes](#)
- [Volume depletion in children](#)

What's new from NICE

The UK's [National Institute for Health and Care Excellence \(NICE\)](#) has published the following new (or revised) guidelines and quality standards.

- [Babies, children and young people's experience of healthcare](#) - NICE guideline [NG204]
- [Bronchiolitis in children: diagnosis and management](#) - NICE guideline [NG9]
- [COVID-19 rapid guideline: managing COVID-19](#) - NICE guideline [NG191]
- [COVID-19 rapid guideline: vaccine-induced immune thrombocytopenia and thrombosis \(VITT\)](#) - NICE guideline [NG200]

Wellbeing and appreciation events

2021 – [International Year of Health and Care Workers](#)

2021 – [International Year of Peace and Trust](#)

September – [Childhood Cancer Awareness Month](#)

September 14 – [Australian Reading Hour](#)

September 20 – [Migraine & Headache Awareness Week](#)

September 17 – [World Patient Safety Day](#)

September 19 – [Talk Like a Pirate Day](#)

September 20 – [National Week of Deaf People](#)

September 29 – [World Heart Day](#)

October 1 – [Health Literacy Month](#)

October 6 – [World Cerebral Palsy Day](#)

October 8 – [World Sight Day](#)

October 10 – [World Mental Health Day](#)

October 11 – [Anti-Poverty Week](#)

October 11 – [National Carers Week](#)

October 16 – [World Food Day](#)

October 18 – [International Infection Prevention Week](#)

October 20 – [Pharmacy Technician Day](#)

Top 50 Most-Cited Campus Publications - updated

This list is updated every three to four months; significant changes are unlikely to occur more frequently.

We compile the list using *Scopus*, an abstract and citation database of peer-reviewed literature.

We search the Affiliation field for *Royal Children's Hospital, Murdoch Children's Research Institute, and Department of Paediatrics, University of Melbourne*. Results are then sorted in descending order of times cited. Each item is manually edited for formatting consistency. The list is then exported and converted to a usable format.

Limitations:

- Publications must be contained in the Scopus database
- Campus affiliation is not always included in all publications.

Library Training: coming sessions

Improve your literature searching skills at the Library

If you can't make it to the scheduled sessions, [contact us](#) to arrange individual or group sessions at a time that suits you. Charges apply for some Library training.

[See the Library website](#) for full session details.

See our full list of [EndNote Tips](#) and [Database Search Tips](#), or our [Fact Sheets](#) for more in-depth information on searching or using Library services.

AIHW – latest updates

Australian Burden of Disease Study 2018 – Key findings

Every year in Australia, millions of years of healthy life are lost because of injury, illness or premature deaths in the population.

This loss of healthy life is called the 'burden of disease'. Information on the burden of disease and injuries as well as the contribution of various risk factors to burden is important for monitoring population health and for providing an evidence base to inform health policy and service planning. [Read the report.](#)

The first year of COVID-19 in Australia: direct and indirect health effects

This report looks at the direct and indirect health effects of COVID-19 in Australia. It includes information on case numbers, deaths and burden of disease as well as the impact on other diseases, health services, changes in health behaviours and social determinants. By 20 June 2021, there had been just over 30,000 cases and 910 deaths from COVID-19 in Australia. Some groups in the population were more affected than others. [Read the report.](#)

Hearing health outreach services for Aboriginal and Torres Strait Islander children in the Northern Territory

This report presents information on hearing health outreach services provided to Aboriginal and Torres Strait Islander children and young people in the Northern Territory. It shows that in 2020 there were: 2,010 audiology services; 701 ear, nose and throat teleotology services; and 1,004 Clinical Nurse Specialist visits.

Among children and young people who received at least 2 services between 2012 and 2020, 61% had improved hearing loss and 71% had improved hearing impairment. [Read the report.](#)

Indigenous eye health measures 2021

This report is part of a series of annual reports that update the Indigenous eye health measures.

The measures cover the prevalence of eye health conditions, diagnosis and treatment services, the eye health workforce and outreach services. Subject to data availability, the report examines differences between Indigenous and non-Indigenous Australians, as well as differences by factors such as age, sex, remoteness, jurisdiction and lower level geographies.

The report provides an evidence base for monitoring changes in Indigenous eye health over time, access to and use of eye health services, and for identifying gaps in service delivery. [Read the report.](#)

Pedal cyclist hospitalisations: estimating on-road cases

This report compares the use of different criteria to distinguish between pedal cyclist hospitalised injury cases occurring in on-road and off-road settings.

The Traffic method overestimates on-road cases because a coding rule requires that cases where place of occurrence is unspecified should be coded as occurring 'in traffic', while the Place method likely underestimates on-road cases because some cases with unspecified place of occurrence will have occurred on-road.

Ways to improve delineation between on-road and off-road cases are proposed. [Read the report.](#)

Health and Science News

- **V is for Victoria – and it can still be for Victory:** One of the authors behind Victoria's roadmap out of last year's lockdown gives a personal reflection on the last 18 months and reminds us we're not helpless or hopeless. [Read more](#) [source: pursuit.unimelb.edu.au]
- **Baby detector software embedded in digital camera rivals ECG:** Researchers have developed software that can reliably detect a premature baby's face in an incubator and remotely monitor its heart and breathing rates, rivalling ECG machines and even outperforming them. [Read more](#) [source: scimex.org]
- **Turning cameras off during virtual meetings can reduce fatigue:** The study also shows the effects are often stronger for women and newer employees. [Read more](#) [source: sciencedaily.com]
- **Why lockdown is making it hard for you to concentrate:** Scientists have found the 'Groundhog Day' effect of lockdown affects our memory and cognitive ability. [Read more](#) [source: healthtimes.com.au]
- **Teaching an old dog new tricks: An existing drug opens new possibilities for treating childhood leukemia:** Researchers showed that the tumor-inhibiting gene TET2 is silenced in a large fraction of cases of acute lymphoblastic leukemia (ALL) in children, and that the gene can be reactivated by treatment with an existing drug. [Read more](#) [source: sciencedaily.com]
- **Safety net for doctors gets the tick from investors:** "You need a huge database of questions and answers and all the different symptoms and conditions that people can have, and we thought that an interesting way to build that database would be to create a product for students". [Read more](#) [source: aushealthit.com]
- **COVID-19 in children with cancer: Severe disease and disrupted treatment:** The study found that 65% of patients were hospitalized and 17% required admission or transfer to a higher level of care. [Read more](#) [source: sciencedaily.com]
- **Protection from two doses of vaccine wanes within six months, data suggest:** Protection after two doses of the Pfizer vaccine decreases from 88% at one month to 74% at five to six months; protection for AstraZeneca decreases from 77% at one month to 67% at four to five months. [Read more](#) [source: bmj.com]
- **Do kids get long COVID? And how often? A paediatrician looks at the data:** Children can get long COVID, but it seems to be less common than in adults. And they tend to recover quicker. [Read more](#) [source: theconversation.com]
- **Covid-19 booster vaccines: What we know and who's doing what:** A preprint from Israeli researchers has reported that the risk of infection is significantly higher among people who were vaccinated earlier in the pandemic than among those vaccinated later. [Read more](#) [source: bmj.com]
- **At a children's hospital, a wave of young patients struggling to breathe:** A federal "surge team" is helping exhausted doctors and nurses through one of the most trying periods in the history of Children's Hospital New Orleans. [Read more](#) [source: nytimes.com]
- **COVID-19 pandemic illuminates the importance of airborne transmission of respiratory viruses:** SARS-CoV, MERS-CoV, influenza, measles, and the rhinoviruses that cause the common cold can all spread via aerosols that can build up in indoor air and linger for hours. [Read more](#) [source: news-medical.net]
- **Largest study of masks yet details their importance in fighting Covid-19:** Scientists conducted a randomized trial across 600 villages and more than 340,000 people in Bangladesh and found that even some adoption of surgical masks made a difference. [Read more](#) [source: nbcnews.com]
- **These charts show that COVID-19 vaccines are doing their job:** Immunizations are keeping the majority of vaccinated people out of the hospital. [Read more](#) [source: sciencenews.org]
- **Study finds greater risk of death from medical causes for infants with histories of reported maltreatment:** Researchers found that the risk of death from medical causes among infants reported for maltreatment was two to three times greater than observed for infants never reported. [Read more](#) [source: news-medical.net]
- **Allergy-causing pollen levels much higher in 2010s than 1990s:** This is the first study of airborne pollen level comparison in a subtropical city. [Read more](#) [source: scimex.org]
- **Significant increase in premature babies surviving without disability:** A 25-year study led by the RMH has found that the number of premature babies surviving without disability has increased by 20 percent. [Read more](#) [source: medicalxpress.com]
- **India's DNA COVID vaccine is a world first – more are coming:** It uses circular strands of DNA to prime the immune system against the virus SARS-CoV-2 and is administered into the skin without an injection. [Read more](#) [source: nature.com]

EndNote Tip: import EndNote references into Covidence

To import your EndNote references into Covidence you must export them from EndNote either as an XML file or RIS file. Both types will perform the same task.

1. XML file

- In EndNote, highlight the references to export
- Go to File/Export
- Save as type: XML (*.xml),

Save as type:	XML (*.xml)
Output style:	Show All Fields

2. RIS file

- In EndNote, highlight the references to export
- Go to File/Export
- Save as type: Text file (*.txt)
- Output style: RefMan (RIS) Export.

Save as type:	Text File (*.txt)
Output style:	RefMan (RIS) Export

[online]

[Botulinum neurotoxin : a guide to motor point injections](#) / by Chong Tae Kim. Elsevier, 2022

A practical, how-to guide for both new and experienced clinicians, Botulinum Neurotoxin: A Guide to Motor Point Injections identifies the correct motor points for botulinum neurotoxin (BoNT) injections for non-cosmetic purposes such as muscle dystonia, muscle spasticity, teeth grinding, or drooling.

Dr. Chong-Tae Kim expertly guides readers through the efficient blocking of neurotransmitters using BoNT, identifying target muscles and clearly demonstrating how to identify optimal insertion points.

[online]

[Comprehensive gynecology](#) / edited by David M. Gershenson ... [et al.]. Elsevier, 2022. 8th ed.

With its trademark clear, concise writing style and evidence-based focus, Comprehensive Gynecology, 8th Edition, remains your #1 choice for practical, in-depth coverage of any women's health issue you're likely to encounter.

It covers all key issues in gynecology, now fully updated to include new information on topics such as laparoscopy and innovations in robotic surgery, reversible contraception, and advancements in treating endometriosis.

For residents, specialists, primary care doctors, and other healthcare providers, Comprehensive Gynecology is an easy-to-access source of trusted information for everyday practice.

[online]

[Illustrated textbook of paediatrics](#) / edited by Tom Lissauer and Will Carroll. Springer, 2022. 6th ed.

This sixth edition of the acclaimed and award-winning 'Sunflower book' comprehensively covers the undergraduate curriculum in paediatrics and child health.

Topics are made accessible with numerous colour images, diagrams and case studies, and revision is facilitated by key points and summary boxes. This has made the book a firm favourite of medical students as well as trainees approaching clinical speciality exams, both in the UK and internationally.

[Prevention, recognition and management of fetal alcohol spectrum disorders](#) / edited by Raja A. S. Mukherjee, Neil Aiton. Springer Nature, 2021

This book presents clinical assessment and management solutions for those people who are exposed to Alcohol in Pregnancy. Over the last few decades we have begun to understand the enduring effects of prenatal alcohol exposure on the developing fetus.

The consequence of prenatal alcohol exposure - Fetal Alcohol Spectrum Disorders is a lifelong disorder and affects children and adults. It is a condition which is significantly under-recognised for many reasons.

Assessment and diagnosis requires the input of multiple different professionals, and referral pathways are often poorly developed or non-existent. Information to support and guide these professionals in practical ways, what to do and how to help, remains limited.

This book seeks to fill some of that gap by offering professionals, clear and useable research-based information and guidance that will help in their practice whilst also being a useful resource for anyone new to this increasingly recognised area of work.

The book is divided into four broad areas bringing together chapters authored by experts in their field including those with lived experiences. Part one focuses on presenting an overview of the condition, and approaching women about their alcohol use and risk followed by part two focusing more around diagnostic issues. Part three follows with management advice, and part four revolves around policy and health prevention in general.

Each chapter is designed to offer insight but also practical tips and support in an accessible manner. The book offers an essential guide for a broad range of health and social care professionals working with this condition.
