

Library Update

No.4, 6th May, 2024

Ebooks: an online platform comparison

Many ebooks can be downloaded and read offline, however your options for reading, downloading, and printing differ between publishers and platforms.

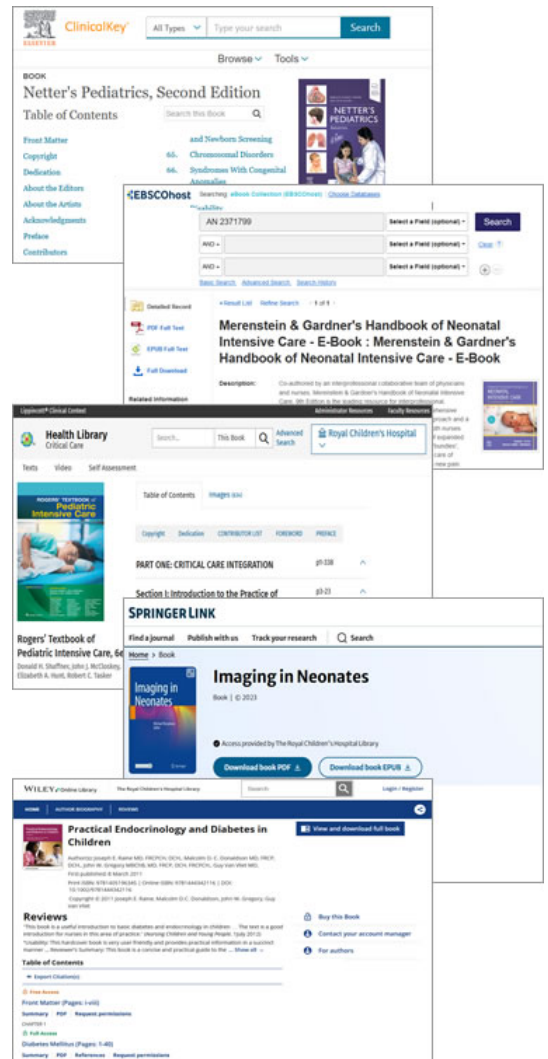

For example:

- **ClinicalKey:** download entire books or individual chapters in full after creating a free personal account.
- **EBSCO:** accessible only by up to three users at a time. They may be downloaded (in PDF or EPUB format) for up to 7 days, after which time they expire. Printing is limited, up to 100 pages. Use your free EBSCO account to check out, and install Adobe Digital Editions to read offline.
- **Ovid:** read online only. Tables and figures from individual chapters may also be downloaded as PowerPoint slides.
- **Springer:** download entire books or individual chapters.
- **Wiley:** download entire books or individual chapters.

Get access to thousands of ebooks via the Library [catalogue](#). Search for a topic, author or title and use the drop-down menu labelled *Everything* and select *Ebooks*. This will display only electronic books that meet your search criteria.

See [Fact Sheet no.10: The Library Catalogue](#) for more detailed information about using the catalogue.

Off-site access to all ebooks requires an OpenAthens login. See [more information](#) on the website, or download our [Fact Sheet no.13: Remote Access](#).

Reminder: new Document Delivery charges

From 1st April, 2024, new charges were implemented for our Document Delivery service.

Non-urgent: \$11.00 per item, typically received within 1 – 4 days .

Urgent: \$30.00 per item, typically received within 48 hours.

Express: \$45 per item, typically received same day if requested before 1pm.

Turn-around times are for Monday to Friday only.

[More information](#) on the Library website.

Library Update

Journal reading apps to stay current

Browzine

[BrowZine](#) keeps you up to date with the latest issues of all your favourite journals. It is fully integrated with the Library's journal database, which ensures you see only those titles where access is available.

When combined with the browser extension [LibKey Nomad](#) you can get one-click access to Library-subscribed online journal content.

Read by QxMD

[Read by QxMD](#) helps you keep up with new research, topics of interest in your chosen specialty, and the latest articles from your favourite journals.

The app provides a simple interface that provides quick access to the medical literature by connecting you to RCH Library-subscribed content on the go.

Trip database: updates

[Trip database](#) developers are constantly working on improvements. Here are some of the latest updates and tips:

- [Latest evidence from Trip](#): this feature is being re-evaluated; users are encouraged to share insights and suggestions for improvement.
- [Update on one LLM project: Q&A](#): ask a free-text question and this automated Q&A system generates an answer. First tests were encouraging, further testing continues.
- [Simple searches](#): observations on single concepts searches; [take a simple poll](#) to help developers provide better results.
- [Restricting results to a single publisher](#): a simple tip to refine your search results to a single publisher.
- [Quality improvement](#): removing incorrectly tagged systematic reviews.
- [Related articles](#): a simple feature showing related content that can be very useful.

Search tip: search across multiple databases

While we recommend that you search across multiple databases so your search becomes more comprehensive, you must always adapt your search terms and syntax to suit each database and platform. [Read more on the Library website.](#)

Wellbeing and appreciation events

May	65 Roses Month (cystic fibrosis)
May	Neurofibromatosis (NF) Awareness Month
May	Crohn's and Colitis Awareness Month
6 May	International No Diet Day
7 May	World Asthma Day
8 May	International Thalassaemia Day
8 May	World Red Cross and Red Crescent Day
10 May	Are You Safe at Home? Day
12 May	International Nurses Day
13 May	Education Week
13 May	National Families Week
15 May	International Day of Families
16 May	Celiac Awareness Day
16 May	International Day of Living Together in Peace
17 May	Pirate Day (Kids' Cancer Project)
20 May	National Volunteers Week
20 May	International Clinical Trials Day
22 May	National Safely Walk to School Day
22 May	National Simultaneous Storytime
23 May	Australia's Biggest Morning Tea
26 May	Food Allergy Week
26 May	National Sorry Day
27 May	National Reconciliation Week
31 May	Tracky Dack Day
31 May	World No Tobacco Day

Library Training: coming sessions

[See the Library website](#) for full session details.

Nursing & Allied Health.....	Wed 15 May, 2:30 pm
Cochrane Library	Thu 9 May, 4.00 pm
EndNote Tutorial 1	Thu 9 May, 10:00 am
EndNote Tutorial 2	Thu 16 May, 10:00 am
EndNote Demonstration.....	Wed 22 May, 9:00 am
Finding the Evidence	Fri 10 May, 2:00 pm
Introduction to the Library	Fri 24 May, 12:00 pm
Ovid Medline	Fri 10 May, 3:00 pm
PubMed.....	Tue 7 May, 9:00 am

Library Update

Cochrane Library: new items

Access

Select *Cochrane Library* from the Library's list of [databases](#), and just start searching. A registered login allows you to save search histories for future use. Go to *Advanced Search* to log in or register for an account.

Recently added items

Editorials:

- Time to shift the research agenda for Hospital at Home from effectiveness to implementation. [Read more](#)
- Unlocking the power of global collaboration: building a stronger evidence ecosystem together. [Read more](#)

New Cochrane Database of Systematic Reviews:

- Corticosteroids for the prevention and treatment of bronchopulmonary dysplasia: an overview of systematic reviews. [Read more](#)
- Dipyrrone for the acute treatment of migraine attacks in children and adults. [Read more](#)
- High-flow nasal cannula therapy for infants with bronchiolitis. [Read more](#)
- Inhaled bronchodilators for the prevention and treatment of chronic lung disease in preterm infants. [Read more](#)
- Macrolide antibiotics (including azithromycin) for cystic fibrosis. [Read more](#)

News from your State and National libraries

[Artefacts](#): A Virtual Reality Experience. Explore the artefacts uncovered during the Metro Tunnel's archaeological digs – one of the largest archaeological digs in Victorian history. Using an Oculus headset, be transported to pre-colonial woodlands and the various time periods each artefact originates from. Also [book in for a free masterclass](#) which gives insight into the design process from the initial concept through to storytelling and development.

[Discovering trench art](#): The creative expression that comes from the frontlines. In this blog post you can learn about some of the incredible items made by soldiers, using discarded ammunition and any other material they could find. These objects depict their feelings and emotions about the war and their surroundings.

[First Australian books](#): Explore books related to Aboriginal and Torres Strait Islander peoples in Trove. From contemporary fiction to biographies, historical works to in-language materials, or science texts to artists books, this collection feature provides a portal into the many local, community, organisational and government stories from the 1800s to today.

[Nineteenth century Victorians](#): See the John Etkins collection, consisting of over 4000 mainly mid-19th century photographs, capturing Australian home life, social history and studio portraiture.

Australian National Persistent Identifier (PID) Strategy: Accelerating Research Excellence and Impact

The Australian Research Data Commons (ARDC) has released the [Australian National Persistent Identifier \(PID\) Strategy](#), which will help with the adoption of PIDs to identify and connect entities in Australia's research and innovation ecosystem for greater, faster impact. The approach to the National PID Strategy and Roadmap reflects and is informed by international developments in both research and innovation and the international PID environment.

The Strategy is accompanied by a [Roadmap](#), which provides an actionable national collaborative plan and a set of tools to support implementation of the Strategy.

AIHW – latest reports

Australia's health performance framework – 6 indicators

The Australian Health Performance Framework (AHPF) is a tool for reporting on the health of Australians, the performance of health care in Australia and the Australian health system.

The indicators within the framework can be disaggregated and analysed through selected population groups, providing a rich source of information at the National, State and Territory and local levels (where data available). [Read now.](#)

Child Protection Australia 2021-22: Aboriginal and Torres Strait Islander children

This report (released 6 June 2023) provides an overview of children in the child protection system in 2021–22, including children subject to notifications, investigations, and substantiations of maltreatment, and the ways children were supported. The update presents data on Aboriginal and Torres Strait Islander children in the child protection system. [Read now.](#)

COVID-19 Register: linkage results

The COVID-19 Register is a linked data asset that enables evidence-based research, and public health and health system planning for current and future pandemics. This linkage project also facilitates selected information to be fed back and incorporated into the local notifiable disease systems of states and territories to improve data completeness and utility. [Read now.](#)

Diabetes: Australian facts

Provides key information for monitoring diabetes in the Australian population, focussing on diabetes risk factors, major subtypes, treatment and impact. The report includes information on incidence, prevalence, hospitalisation and deaths, with additional analysis of priority population groups. An interactive data tool allows for further exploration of available data. [Read now.](#)

Family, domestic and sexual violence

This website brings together information from a range of sources to provide a comprehensive picture of FDSV in Australia and summarises changes in key measures over time. Regular updates are made to include the latest available data for key national data sources. [Read now.](#)

MyHospitals: Emergency department care 2022-23

In 2022–23, there were 8.8 million presentations to EDs nationally. See data tables and links to further information and visualisations on overall activity and access measures which includes nationally agreed performance indicators on waiting times for care, time spent in the ED, and other waiting times statistics. [Read now.](#)

OECD health care quality and outcomes indicators, Australia 2022-23

This report summarises data for Australia provided to the Organisation for Economic Co-operation and Development's (OECD) 2022–23 Health Care Quality and Outcomes data collection. It compares these data with Australia's performance for previous years and with data reported by other OECD countries. For this collection, Australia submitted data for most of the indicators and performed above the OECD average on 13 of the 36 indicators. [Read now.](#)

Specialist paediatric palliative care delivered to children who died in 2021

Paediatric palliative care aims to help alleviate symptoms and improve the quality of life of a child with a life-limiting condition and their family. This report aims to build the evidence-base for the specialist needs of children with life-limiting conditions. It describes the characteristics, the types of services received, and the quality of care for children who died in 2021 and received palliative care services from a participating children's hospitals. [Read now.](#)

Health and Science News

Viruses finally reveal their complex social life: New research has uncovered a social world of viruses full of cheating, cooperation and other intrigues, suggesting that viruses make sense only as members of a community. [[Quanta Magazine](#)]

[Children of incarcerated parents: integrating research into best practices and policy](#) / edited by Judy Krysik, Nancy Rodriguez. Springer, 2022

This book presents multidimensional knowledge on children of incarcerated parents using Bronfenbrenner's ecological theory as an organizing framework. It examines the extent to which different levels of the environment are supportive (i.e., leading to resilience) and stress-producing (i.e., contributing to risk). The book explores four levels of the environment – microsystem, mesosystem, exosystem, and macrosystem – with specific theories and paradigms woven into the inquiry at each.

[online]

[Clinical behavior analysis for children](#) / edited by Adriana Suzart Ungaretti Rossi, Ila Marques Porto Linares, Luiza Chagas Brandão. Springer, 2022

This guide is for child psychotherapists interested in applying clinical behavioural analysis to their work and for clinical behaviour analysts working with children. It brings together chapters written by therapists who share their views on theoretical and practical aspects of childcare and describe the stages and challenges of the psychotherapy process with clients of up to 12 years of age. Chapters cover theories of child development from the perspective of behaviour analysis; biological influences on the development of child behaviour; clinical assessment and definition of therapeutic goals in the work with children; how to include functional play in clinical settings; and how to involve parents and the school in the therapeutic process.

[online]

[Clinical immuno-oncology](#) / by John E. Niederhuber. Elsevier, 2024

Offering focused, practical, and up-to-date content on immunotherapies used to treat a wide variety of cancer types, this book covers the basic cellular and molecular mechanisms involved in cancer initiation and progression.

It reviews the development of tumor specific antigens and the challenges of developing cancer immunotherapies, explains the basics of cancer immunotherapy, discusses best practices, and provides recommendations from experienced clinicians in the field.

The authors provide clinically focused information essential for integrating new therapies into practice—making this an ideal resource for fellows, practitioners, and other cancer team members in medical oncology, radiation oncology, cancer surgery, immunology, and cancer research.

[Grief in schools: basic knowledge and advice on dealing with dying and death](#) / edited by Matthias Böhmer, Georges Steffgen. Springer, 2022

Grief reactions of children and adolescents are described and reasons for grief are presented, including: death due to chronic illness, sudden deaths such as suicide, accident, and severe targeted violence. Appropriate intervention measures are discussed, along with a discussion of the limitations of these intervention measures in schools.

This book is a translation of the original German 1st edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.

[online]

[Handbook of evidence-based day treatment programs for children and adolescents](#) / edited by Jarrod M. Leffler, Elisabeth A. Frazier. Springer, 2022

This book examines the intermediate level of mental health services with a focus on partial hospitalization program (PHP) and intensive outpatient program (IOP) models of care for youth. It reviews the history of PHPs and IOPs and highlights their current care models, demonstrating the increase in the development and implementation of evidence-based treatment (EBT) practices.

The book explores issues relating to program development, implementation, and considerations for sustainability. It provides interventions designed to enhance the well-being of youth who are experiencing a range of mental health concerns as well as strategies to engage and involve their families.

In addition, the book offers feasible strategies for measuring outcomes and applying these results to meaningful clinical evaluations in PHP and IOP settings.

Library Update

[online]

[Handbook of resilience in children](#) / edited by Sam Goldstein, Robert B. Brooks. 3rd ed. Springer, 2023

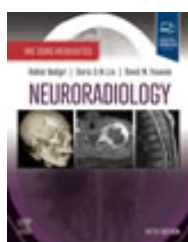

This third edition addresses the concept of resilience in children who overcome adversity, and explores the development of children not considered at risk addressing recent challenges as a consequence of the COVID-19 pandemic. It reviews the scientific literature that supports findings that stress-hardiness

and resilience in all children leads to happier and healthier lives and improved functionality across the lifespan. Expert contributors examine resilience in relation to environmental stressors as phenomena in child and adolescent disorders and as a means toward positive adaptation into adulthood. It includes new and revised chapters that explore strategies for developing resilience in families, clinical practice, and educational settings. Key areas of coverage include an exploration of the four waves of resilience research, resilience in boys and girls and an assessment of social and emotional competencies related to resilience and more.

[Neuroradiology: the core requisites](#) / by Rohini Nadgir, Doris D.M. Lin, David M. Yousem. 5th ed. Elsevier, 2025

This text emphasizes the basics to help you establish a foundational understanding of neuroradiology during rotations, prepare for the core and certifying exams, and refresh your knowledge of key concepts. This completely rewritten and reorganized edition emphasizes the essential

knowledge you need in an easy-to-read format, with thorough updates that cover new imaging modalities, the latest guidelines, and integration of physics information throughout. *Neuroradiology the core requisites* contains hundreds of high-quality images, including diffusion weighted imaging, perfusion imaging, MR and CT angiography, and MR spectroscopy.

[online]

[Online resilience and wellbeing in young people: representing the youth voice](#) / by Andy Phippen, Louisa Street. Palgrave Macmillan, 2022

This book explores online resilience and safety from a new perspective, by drawing extensively upon the youth voice.

While “online safety” as a concept has now existed for well over ten years, the majority of policy and narrative is driven by preventative and adultist views of ensuring safety from harm.

Underpinned by extensive empirical work, this book argues that safety, or freedom from harm, is not an achievable goal and we should refocus upon harm reduction and risk mitigation. Fundamental to this argument is that the youth voice clearly states that they will not disclose, or ask adults for support, because they do not believe they will get help or worse, will be punished as a result of disclosure.

The research shows that professionals often bring their own digital value biases into safeguarding decisions, and feel that they should be white knights to young people, rather than listening to them and supporting them in a non-judgemental way.

This book will be of great value to researchers and students as well as practitioners, teachers and parents interested in digital resilience and safeguarding, internet security and youth online behaviour and wellbeing.

[online]

[Remington and Klein's Infectious diseases of the fetus and newborn infant](#) / edited by Yvonne A. Maldonado. 9th ed. Elsevier, 2025

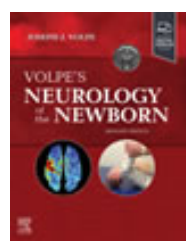

This text provides expert coverage in immunology and infectious diseases. It offers the most up-to-date and complete guidance on infections found in utero, during delivery, and in the neonatal period in both premature and term infants—indispensable information for all clinicians who are involved in the

care and well-being of these vulnerable patient populations.

It provides a detailed summation of existing information on fetal and neonatal infections and contains two new chapters on SARS-CoV-2 and Zika.

[online]

[Volpe's Neurology of the newborn](#) / edited by Joseph J. Volpe ... [et al.]. 7th ed. Elsevier, 2025

This new edition brings a wealth of insight to this classic text. Known for its clear, engaging writing style, vibrant, full-colour illustrations, and authoritative information throughout, this reference is an indispensable resource for those who provide care for neonates with

neurological conditions.

The book provides clear, comprehensive coverage of neonatal neurology for a cohesive source of answers to any question that arises in your practice.
